PROFESSIONAL SUMMARY

Full-Stack WebDeveloperwith hands-on experience building and deploying production-grade MERN stack applications. Skilled in designing RESTful APIs, building responsive React frontends, and integrating MongoDB/MySQL databases. Adept at implementing JWT authentication, writing clean modular code, and collaborating on real-world projects. Seeking a Full Stack Developer role to contribute to modern web application development at Feezentech.

TECHNICAL SKILLS

Frontend	React.js, HTML5, CSS3, Tailwind CSS, Responsive UI Design
Backend	Node.js, Express.js, REST API Design, Middleware Architecture
Database	MongoDB, Mongoose, MongoDB Atlas, MySQL (familiar)
Auth & Security	JWT Authentication, bcrypt Password Hashing, Protected Routes
Tools & Platforms	Git, GitHub, Postman, VS Code, Render, Vercel
Languages	JavaScript (ES6+)

PROJECTS

CampusRide—Full-StackRide-SharingPlatform

campus-ride-fullstack-project.vercel.app/login

Tech Stack: Node.js, Express.js, React.js, MongoDB, JWT, bcrypt, Render, Vercel

- Built and deployed a **production-grade full-stack ride-sharing app** featuring 10+ REST API endpoints for ride creation, search, booking, and cancellation — live and accessible online.
- Designed and modelled **4 relational data entities** (Users, Rides, Bookings, Drivers) using Mongoose with reference-based relationships and optimized nested lookup queries.
- Implemented **JWT-based authentication** and bcrypt password hashing to secure all protected routes and prevent unauthorised data access.
- Built a **React.js frontend** with responsive UI components, integrated with backend APIs for seamless user experience.
- Engineered **centralized input validation and error-handling middleware** ensuring consistent, predictable API responses across all endpoints.

ExpenseTracker—RESTfulBackend API

github.com/Shubh-dev03/ExpenseTracker_Backend

Tech Stack: Node.js, Express.js, MongoDB

- Engineered a **RESTful expense tracking API** with 3 modules (transactions, categories, summaries) supporting full CRUD, user-scoped data isolation, and paginated query responses.
- Designed **protected routes using JWT middleware** to enforce per-user data access and prevent cross-account queries.
- Validated all **8+ API endpoints with Postman**, covering edge cases for invalid input, missing fields, and unauthorized access — ensuring API reliability.
- Applied **modular folder structure and MVC-like architecture** for clean, maintainable, and scalable codebase.

EDUCATION

Sandip University, Nashik

Sept 2022 – July 2026

Bachelor of Technology in Computer Science • CGPA: 7.56 / 10
